# Goat production in Vojvodina - Serbia

*Doc. Dr. Ivan Pihler*

MACEDONIA

Debrecen, 2014.

# Serbia

- Total area 77,474 km<sup>2</sup>
- Population 7,186,862, with population density 106,34/km<sup>2</sup>
- We have two geographically and historically separated units, the north part is Autonomous Province of Vojvodina and the south part is Central Serbia
- Vojvodina is the lowland region while the Central Serbia is hilly region
- Geography characteristics affects that agriculture in Vojvodina is more intensive than in Central Serbia.

MACEDONIA

- The average farm size is 3,59ha
- In average, every farm has three separate plots, and that is result of decades of poor agricultural policies

Type of agricultural land	(000)ha	
	Vojvodina	Serbia
Agricultural land	1.789	5.112
Cultivable land	1.648	4.252
Arable land	1.581	3.345
Orchards	18	244
Vineyards	11	67
Meadows	37	596
Grasslands	111	824

The total number of goats in Serbia and AP Vojvodina, and the number of goat under control of productivity from 2006. to 2013.

Under control of productivity is 1.53% of goats

The total number of goats in Vojvodina and the number of goats under control of productivity from 2006. to 2013.

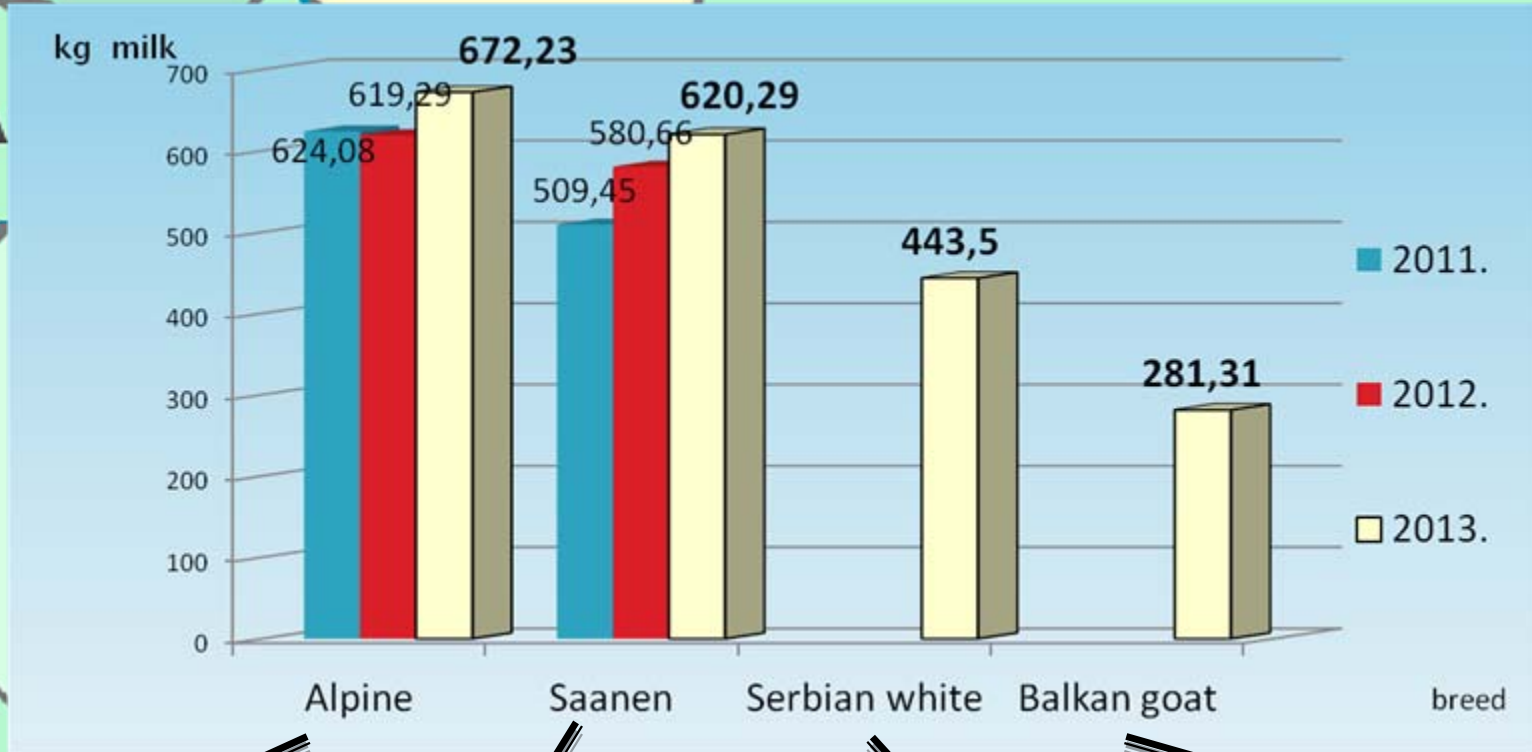

- The average herd size is 92,71 head per breeder
- The most common are breeders who have 30 to 60 animals
- Under control of productivity is 4,9% of goats
